## Vocabulary List for "The Science of Energy"

			44.0	
1	power (v)	動かす動力供給する	英英	supply (a device) with mechanical or electrical energy
			例文	What powers your phone, air conditioners, and your brain is nothing else but energy.
2	satisfactory	満足のいく	英英	fulfilling expectations or needs; acceptable, though not outstanding or perfect
			例文	Even Nobel Prize winners have trouble providing a satisfactory answer to that question.
3	seemingly	外見上は 見たところ	英英	so as to give the impression of having a certain quality; apparently
			例文	They have great trouble providing a satisfactory answer to that seemingly simple question.
4	comprehensive	包括的な網羅的な	英英	complete; including all or nearly all elements or aspects of something
			例文	We have no ultimate and comprehensive definition of energy.
5	derive	派生する由来する	英英	obtain something from (a specified source)
			例文	The term "energy" derives from an ancient Greek word "energeia."
6	abstract	抽象的な	英英	existing in thought or as an idea but not having a physical or concrete existence
	aostract		例文	Aristotle has given an abstract definition to this concept; force capable of doing work.
7	ambianana	あいまいな	英英	open to more than one interpretation; having a double meaning
7	ambiguous		例文	It may appear ambiguous and elusive, but he seemed to have grasped the essence of energy.
0	1	とらえどこ	英英	difficult to remember or recall
8	elusive	ろのない	例文	It may appear ambiguous and elusive, but he seemed to have grasped the essence of energy.
			英英	the real physical matter of which a person or thing consists and which has a tangible, solid presence
9	substance	物質	例文	Energy is not about a specific substance or phenomenon.
		変化	英英	the action or process of altering or being altered
10	alteration	変更	例文	Energy is a concept that includes anything that can cause physical or chemical alteration in objects.
	acceleration	加速加速度	英英	increase in the rate or speed of something
11			例文	Workers constructing a Pyramid carried stones by using their muscles to apply acceleration to them.
		運動エネル ギー	英英	energy which a body possesses by virtue of being in motion
12	kinetic energy		例文	The thermal energy boils water, and then it was transformed into the kinetic energy of a steam turbine.
	thermal energy	熱エネルギー	英英	heat energy
13			例文	The thermal energy boils water, and then it was transformed into the kinetic energy of a steam turbine.
	undergo	経験する 経験する	英英	experience or be subjected to (something, typically something unpleasant, painful, or arduous)
14			例文	The water in a kettle is boiling and undergoing a physical transition from liquid to gas.
		液体	英英	a substance that flows freely but is of constant volume, having a consistency like that of water or oil
15	liquid		例文	The water in a kettle is boiling and undergoing a physical transition from liquid to gas.
		気体	英英	a substance in a state in which it will expand freely to fill the whole of a container, having no fixed shape
16	gas		例文	The water in a kettle is boiling and undergoing a physical transition from liquid to gas.
	gravitational	重力の重力による	英英	relating to movement toward a center of gravity
17			例文	A bicycle on a hilltop possesses gravitational potential energy.
	molecule	量力による 分子		, , , ,
18			英英	a group of atoms bonded together, representing the smallest fundamental unit of a chemical compound
			例文	Thermal energy is the kinetic energy of vibrating molecules or atoms in a substance.
19	atom	原子	英英	the basic unit of a chemical element
			例文	Thermal energy is the kinetic energy of vibrating molecules or atoms in a substance.
20	convert	変換する	英英	cause to change in form, character, or function
			例文	One energy form can be converted into another.

## Vocabulary List for "The Science of Energy"

				RIPPLE ENGLISH
21	tracce	たどる	英英	take (a particular path or route)
		遡る	例文	Let us trace the flow of energy that is currently lighting the light bulb in your room back to its source.
22	ambad	## W '7 +>	英英	fix (an object) firmly and deeply in a surrounding mass
	embed	埋め込む	例文	Originally, it was chemical energy embedded in fossil fuel.
23	combustion	燃焼	英英	the process of burning something
			例文	Chemical energy embedded in fossil fuel turned into thermal energy through combustion reactions.
24	power line	送電線	英英	a cable carrying electrical power
			例文	Electric energy travels along power lines to your home.
25	filament	フィラメン ト、繊維	英英	a slender threadlike object or fiber
			例文	Electric energy is converted into light energy by the filament, lighting your room.
26	petroleum	石油	英英	a liquid mixture of hydrocarbons that can be extracted and refined to produce fuels
26			例文	However, not all energy in petroleum is turned into light energy.
27	conservation	保存 不変	英英	the principle by which the total value of a physical quantity or parameter remains constant in a system
27			例文	According to the law of the conservation of energy, every form of energy can be turned into another form.
20		割合部分	英英	a part, share, or number considered in comparative relation to a whole
28	proportion		例文	At each conversion, some proportion of energy is transformed into unintended form and scatters away.
29	aaattan	4#L > #L > _L	英英	throw in various random directions
29	scatter	撒き散らす	例文	At each conversion, some proportion of energy is transformed into unintended form and scatters away.
20	dissinate	NV #L -L -2	英英	disappear or cause to disappear
30	dissipate	消散する	例文	The thermal energy within the turbine dissipates by heating the surrounding air and the cooling water.
0.1	fraction	部分 かけら	英英	a small or tiny part, amount, or proportion of something
31			例文	A fraction of it is turned into thermal energy due to the resistance of the filament in the light bulb.
2.2	diminish	減る 減らす	英英	make or become less
32			例文	No energy is ever lost in any of these conversions, but the utility of energy has diminished in the process.
2.2	**************************************	多数の	英英	great in number; many
33	numerous		例文	There are numerous deities around the world that serve as both the highest god and the symbol of the sun.
2.4	deity	神、女神	英英	a god or goddess (in a polytheistic religion)
34			例文	There are numerous deities around the world that serve as both the highest god and the symbol of the sun.
2.5	radiation	放射能放射線	英英	the emission of energy as electromagnetic waves or as moving subatomic particles
35			例文	Ancient people might have somehow realized that all energy on earth is derived from the sun's radiation.
26	photosynthesis	光合成	英英	the process by which green plants use sunlight to synthesize foods from carbon dioxide and water
36			例文	By the process of photosynthesis, they captured solar energy and packed it into organic compounds.
2.7	compound	化合物	英英	a thing that is composed of two or more separate elements
37			例文	By the process of photosynthesis, they captured solar energy and packed it into organic compounds.
2.0	herbivore	草食動物	英英	an animal that feeds on plants
38			例文	Herbivores eat plants to gain solar energy indirectly, and carnivores eat herbivores to do likewise.
20	carnivore	肉食動物	英英	an animal that feeds on flesh
39			例文	Herbivores eat plants to gain solar energy indirectly, and carnivores eat herbivores to do likewise.
40	smelt	精錬する	英英	extract (metal) from its ore by a process involving heating and melting
			例文	We stay warm and smelt metals by cutting down trees and using them as fuel.

## Vocabulary List for "The Science of Energy"

			1	RIPPLE ENGLISH
41	compress		英英	flatten by pressure; squeeze or press
41	compress	圧縮する	例文	Fossil fuels are the compressed preservation of past solar energy.
42	harness	動力化する	英英	control and make use of (natural resources), especially to produce energy
42	namess	活用する	例文	Water power harnesses the gravitational potential energy of water that is lifted from the ocean onto land by evaporation.
			英英	the process of turning from liquid into vapor
43	evaporation	蒸発	例文	Water power harnesses the gravitational potential energy of water that is lifted from the ocean onto land by evaporation.
44	geothermal	地熱の	英英	relating to or produced by the internal heat of the earth
77			例文	With some exceptions such as geothermal power generation, all sources of energy end up in the sun.
45	hydrogen	水素	英英	the chemical element of atomic number 1
43			例文	Within the sun, hydrogen fusion reactions are constantly taking place, transforming hydrogen into helium.
1.0	fusion	融合	英英	the process or result of joining two or more things together to form a single entity
46			例文	Within the sun, hydrogen fusion reactions are constantly taking place, transforming hydrogen into helium.
47	111	ヘリウム	英英	the chemical element of atomic number 2
47	helium		例文	Within the sun, hydrogen fusion reactions are constantly taking place, transforming hydrogen into helium.
		質量 かたまり	英英	the quantity of matter which a body contains
48	mass		例文	Throughout this nuclear fusion reaction, there is a reduction in the total mass.
		直感に反した	英英	contrary to intuition or to common-sense expectation (but often nevertheless true)
49	counterintuitive		例文	It must sound counterintuitive, but this is part of what Einstein unveiled in the Theory of relativity.
		明らかにす	英英	show or announce publicly for the first time
50	unveil	3 3 6 7	例文	It must sound counterintuitive, but this is part of what Einstein unveiled in the Theory of relativity.
	Relativity	相対性(理論)	英英	the dependence of various physical phenomena on relative motion of the observer and the observed objects
51			例文	It must sound counterintuitive, but this is part of what Einstein unveiled in the Theory of relativity.
	static	静止した静的な	英英	lacking in movement, action, or change
52			例文	Mass is actually a static form of energy that represents the 'inertia' of an object.
	inertia	慣性	英英	tendency to do nothing or to remain unchanged
53			例文	Mass is actually a static form of energy that represents the 'inertia' of an object.
		等しい 等価な	英英	equal in value, amount, function, meaning, etc
54	equivalent		例文	As Einstein discovered, mass is equivalent to energy and they are interchangeable.
		交換可能な	英英	(of two things) able to be interchanged
55	interchangeable		例文	As Einstein discovered, mass is equivalent to energy and they are interchangeable.
		比例した	英英	corresponding in size or amount to something else
56	proportional	釣り合った	例文	Every loss of mass results in the release of energy proportional to the square of the speed of light.
	collision	衝突	英英	an instance of one moving object or person striking violently against another
57			例文	The collision of neutrons with uranium-235 triggers a chain reaction of nuclear fission.
	neutron	中性子	英英	a subatomic particle of about the same mass as a proton but without an electric charge
58			例文	The collision of neutrons with uranium-235 triggers a chain reaction of nuclear fission.
	uranium	ウラン	英英	the chemical element of atomic number 92
59			例文	The collision of neutrons with uranium-235 triggers a chain reaction of nuclear fission.
	fission		英英	the action of dividing or splitting something into two or more parts
60		核分裂	例文	The collision of neutrons with uranium-235 triggers a chain reaction of nuclear fission.
	relentless	絶え間ない容赦ない	英英	oppressively constant; incessant
61				Physicists around the world are still in the midst of a relentless pursuit of the essence of energy.
			例文	1 nysteisis around the world are still in the midst of a retentiess pursuit of the essence of energy.
